AR Interior Design System – Project Plan

Team Members:

Abror Jo’raboyev	230363
Samandar Mirxosilov	230146
Mirjalol Abdujalilov	220564

Team of 3: 1) AR/Unity development 2) 3D models & UI 3) Interaction, testing & documentation.

Goal: Create a smartphone AR application that allows users to place and interact with virtual furniture in a real room.

Stage	Tasks
1. Research	Study AR, plane detection and 3D models.
2. Technology	Use Unity, C#, AR Foundation and ARCore.
3. AR Setup	Set up camera and detect real surfaces.
4. Furniture	Add 3D furniture models.
5. Interaction	Place, move, rotate, resize and delete furniture.
6. UI	Create furniture selection and control buttons.
7. Testing	Test the application on an Android phone.
8. Finalization	Prepare report, diagrams, presentation and demo.

Minimum features: Surface detection, furniture placement, move, rotate, resize and delete.
